

# eLogistics

## Healthcare Logistics

With the accelerated digitalization that we have experienced in recent times, the digital transformation of companies has to be one of the main priorities in order not to be left behind. Companies require the application of digital capabilities to processes to improve their agility, efficiency, error reduction, time reduction and above all cost savings.

At Common M.S. we have created the eLogistics solution that adapts to the logistics processes of companies in different sectors and is the best solution for logistics management.

### MAIN ADVANTAGES

1. Focused on user experience (UX) it is a set of easy and intuitive applications.
  2. e2e coverage of logistics processes: Procurement and Purchasing, Inventory Management and Inventory Management.
  3. Mobile solution, responsive from any device.
  4. Works in online and offline mode.
  5. Access to information in real time for online applications.
  6. Adaptable and configurable for business needs.
  7. Reads different types of codes (1D and 2D) and formats, including GS1.
  8. Traceability by using and reading batches and expiration dates.
  9. Full integration with the SAP® system without the need for additional infrastructure.
  10. Use existing SAP® system configuration, authorizations and SAP® transport system.
  11. Multi-platform: Supports IOS and Android as well as compatible browsers\*.
- \* In desktop-oriented applications

- Optimization of picking routes in a guided and unguided way according to business needs.

#### ORDER RECEPTION

- Order list/search for my warehouse or department
- Warehouse support
- Total deliveries, partial deliveries and asset support

#### PUTAWAY

- Product organization by location to optimize product placement
- Individual location indication: Location-code reading
- Can be activated according to the need of each site

### FMD

The European medicinal product verification system came into force on February 9, 2019; it is regulated by the European Union Delegated Regulation 2016/161 of the Commission of October 2, 2015, which supplements Directive 2001/83/EC of the European Parliament and of the Council by laying down detailed provisions concerning safety features on the packaging of medicinal products for human use (hereinafter referred to as Delegated Regulation 2016/161). Features:

- Applications for the verification/dispensing of medicinal products as well as integration with other services for hospitals.
- Individual and packaged shipments
- Integrated within the SAP® management module

## INVENTORY MANAGEMENT

### SCAN2TAKE / SCAN2RETURN

- Significant reduction of processing time in product consumption\*.
- Possibility to allocate consumptions to patients
- Ability to consume and cancel a consumption in an agile way approximating the theoretical stock to the real stock minimizing the impact for the business.

\*Based on our experience with our customers.

### KANBAN

- Application of the KANBAN method to replenishment logistic processes (double drawer)
- Regular and rush orders
- Visual integration with SAP® standard processes and visual maps

### SCRAPPING
